### "When a Man Loves"

**With John Barrymore and Dolores Costello**  
**GREATEST LOVE STORY EVER TOLD!**

The King had sought her as his mistress, but she turned again—all flame and loveliness—to Des Grieux, whose passion for her had wrecked his brilliant career. To love her meant disaster—and intoxicating joy. A terrible and unknown passion enveloped them. They have only one law—the law of their desire for each other.

Coming Thursday, May 24, "The College Widow"

**This Week**

**"What Price Glory?"**

## Drove Over Big Carmangay Hill

D. F. McKee failed to make the turn on the Carmangay hill while on his way home and his car, a practically new Chrysler 70 coupe, went over the embankment, falling a distance of some 150 feet to the river bottom, battering itself almost to pieces on the way. Mr. McKee escaped with painful but largely superficial injuries, but Fred Bodwin, who accompanied him, was not so fortunate and is now in Leith bridge hospital with a broken pelvis, which will necessitate his remaining in a plaster cast for some weeks. The place where the accident happened has been recognized as very dangerous for some time, and it is quite likely some steps will be taken in the near future to provide some protection at this sharp turn which will prevent repetitions of such accidents.

## Car Damaged Occupants Injured

While returning from his farm on Monday afternoon, J. Doyle ran into a load of lumber who had been left at the side of the road about two miles east of town owing to the wagon having broken down. Mr. Doyle escaped injury, but his little son Tommy and Sherman Collins, who were with him, both sustained cuts from the broken glass of the windshield, which required medical attention, but were fortunately not dangerous. The car, a Ford light delivery, was badly damaged.

## Fire Destroys Barn and Stock

A fire of unknown origin destroyed the barn on the farm occupied by G. C. Stone, near Kirkshead, on Thursday, May 10th, the blaze being discovered while the family were at dinner. The loss included a fine team of horses, harness, cattle, pigs and all the feed for the summer. As Mr. Stone does not smoke the cause of the fire is beyond conjecture.

## Loaded Wagon Runs Over Foot

James Griffin, who was employed with Contractor L. Church in moving bridge material from town to its destination, had the misfortune to have his foot run over by a loaded wagon, inflicting painful injury to his foot and ankle. While the injury will prevent his working for some little time, no permanent disability is likely to result. He had just started on the job on Tuesday morning when the accident occurred.

## Vulcan Wins Exhibition Game

Champion took the short end of a 12-2 score in the first game of the season, played here on Sunday afternoon. Welch, in the box for Champion, was fairly effective, but ragged support was responsible for the one-sided score. There was a good turn-out for the game, despite the high wind, and the game was enjoyed by the spectators, although the score was rather disappointing to local fans. However, the general opinion is that Champion has some good material that will be heard from before the season is over.

M. P.'s passed a recommendation for increase of salaries for judges by one vote. They would probably have made a vote unanimous for increase of salaries to M. P.'s—Calgary Herald. The Union of Alberta Municipalities as the result of an executive meeting held in Calgary recently, has decided to hold its conference in Edmonton on June 20 to 22. In the past it has been usual to hold the conference in the fall or winter but for some time past there has been a feeling among the members that a summer conference would be preferable.

## P.T.A. Meeting Monday, May 21

On Monday evening next in Campbell's hall is the last meeting of Champion district Parent-Teacher Association and a very interesting programme is being arranged. Mrs. A. V. Pankhurst of Calgary is to address the meeting; Miss Barelay, B.A. of the Champion high school staff is to discuss the "unit system" of high school studies and outline the courses for normal entrance and university examinations (interested parents should come prepared to make notes); and Dr. Hen of Carmangay and Champion is to give a short talk. The evenings enjoyment will be further augmented by musical numbers to be contributed by Mrs. A. S. Roberts of Barons and Mr. and Mrs. Duncan of Champion, Monday evening, May 21st at 8.30 o'clock in Campbell's hall. Admission 35 cents. Everybody welcome.

## War on Weeds To Be Prosecuted

A most intensive weed campaign is to be undertaken at an early date in Alberta, according to a statement made to The Herald on Thursday by H. E. H. Schofield, vice president of the U.F.A., who has returned to the city after attending the initial meeting of the newly appointed advisory board, held in Edmonton, under the auspices of the provincial department of agriculture. Supervisors are to be appointed by the municipalities. Inspectors for local improvement districts will also be appointed by the government.

## Women's Institute To Hold Bake Sale

Bake Sale! The Women's Institute will hold a bake sale and will serve ice cream and cake, also apple pie a la mode in W. C. Hoskins' store on Sat., May 19th commencing 8.00 p.m. Proceeds to be donated to high school tennis club. Everybody come and help make the effort successful.

## Chronicle Completes Ninth Year

This issue completes Volume 9 of the Chronicle. The intervening years since its inception have passed so rapidly as to be almost alarming when the flight of time is considered. Recent years have been more hopeful than were the earlier ones and the future seems to hold almost unlimited prospects for everyone located in this district. While the progress made by the paper has not been satisfactory entirely to the publisher, hopes for the future are high and The Chronicle will endeavor to hold its own with the progress of the district.

The weather has continued fine and crops are making wonderful progress, the wheat fields making an excellent showing. Naturally rain is desired, not because it is badly needed for the crops at present but because its arrival relieves all possible anxiety in the respect. The golf course is rapidly being put into shape and enthusiasts in this line of sport will soon be in a position to feel they have a course in line with the best.

## The Wheat Pool Brings About A New Condition of Affairs

Western Canada's 1927 Wheat Crop Government Estimate 415,000,000 Delivered to Market 370,000,000. Estimated Balance Yet to Be Delivered By Farmer 20,000,000

Over eight months have passed since the commencement of the crop year on September 1, 1927, and ninety per cent. of the crop has been delivered. The great bulk of non-Pool wheat has left the grain lands.

Except for those who have not had their grain threshed in winter conditions, and the few who held their grain since last harvest, the non-Pool farmers have little concern in the present higher prices for wheat. The "Average closing prices" ever on the lips of the grain trade should really be figured during the time the bulk is going on the market. That is from September to April. With very little wheat in non-Pool farmers' hands how can they be benefited by high prices from now on?

Wheat Pool members, on the other hand, have a vital interest in present prices. They have seen their Pool start the crop year under a burden of tremendous wheat supplies, and a handiwork of a cloud of "specie" news. Last fall grain poured in rivers into Winnipeg, and Vancouver's facilities were taxed to the limit. Argentina had raised a tremendous crop. Europe's production was up by millions of bushels. The United States' wheat crop was heavy and altogether things did not look too rosy.

The Canadian Pool had a difficult task on hand and Pool members may have a good excuse for a feeling of elation at the successful manner in which a grave situation was handled by the organization they had created. Pool members are now in a position to participate to an appreciable extent in the rising market prices.

If there was no Wheat Pool in Western Canada what would the situation have been? The bulk of the wheat would be out of the farmers' hands and in the hands of market intermediaries who would reap a very rich profit indeed. The Wheat Pool has changed this situation in a decided fashion. Now Pool members can sit back and wait for the price for their wheat to rise. They will get the best year's average price for the product of their labors.

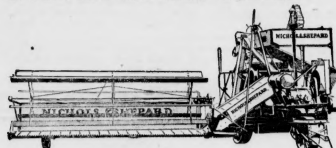

NO ONE IS GOING TO EXTRACT EVAGANT PROFITS FROM POOL WHEAT.

Farmers should realize that only by the Power of Control of Volume has the Wheat Pool been able to function efficiently. This volume is assured by Signed Contracts.

Join your brother Pool members in this vital undertaking.

SIGN A SECOND SERIES CONTRACT NOW.

## Proven in the Fields—

### Where they know Combines

Four years ago the Nichols & Shepard Company set out to build the finest combine that had ever been offered to the American Farmer.

Every detail of combine design and construction was carefully reviewed by men who had been building and using combines since the beginning.

When these machines had been built, they were sent into the grain fields and followed the wheat crop from Texas to Montana, harvesting more in a single season than most machines would in a lifetime.

Every point in their construction has been proven right in principle and right in practice.

That is why the Nichols & Shepard Combine today includes a

40 inch Draper, Weight balanced on all three wheels, 32 Anti-Friction Bearings, Aluminized-Zerk Lubrication, High Speed Chains and Sprockets, Straw Carriers, Efficient Cleaning Shoes, Waterproof Fiber Pulleys, Recliner, Special Combine Motors, One-Man Control, Safety Snap Sprockets.

BUILT BY NICHOLS & SHEPARD

In Continuous Business Since 1849

All these, and a host of other features proven in the fields where they know combines. Sold by

## To Select Head For Alberta University

Hon. Perren Baker, Minister of Education, will leave shortly for Eastern Canada and the United States on a tour of investigation which will have as its object the location of likely appointees for the post of president of the University of Alberta. Dr. H. M. Tory, who has occupied this post since the organization of the University in 1908, is leaving at the end of June to accept the chairmanship of the National Council of Scientific Research.

Farmers through seedling have passed the novelty stage during the past few days. Now the exception is the man who is not through putting in his crop.

## Local and General

The Women's Institute are holding a bake sale and serving home-made ice cream and cake on Saturday evening, May 19th.

Mr. and Mrs. Fred Starr, who had been visiting in this vicinity, left recently for Browning, Montana.

The trees in the park are being adorned with the decorations of their splendid appearance is due to the work done by P. O. Sommers in putting them into shape this spring.

Lost, some time ago, a crepe-de-choise scarf, colors greenish blue, with painting and long fringe on ends. Finder please return to Forbes McGilivray and receive reward.

Remember the P.T.A. meeting in Campbell's hall on Monday evening, May 21st. Mrs. Parkhurst, of Calgary, will be the principal speaker on this occasion and a splendid programme will be offered.

The Ladies' Aid will meet at the home of Mr. W. C. Holmes on Thursday, May 21st. At the last meeting, held at Mrs. J. N. Beaulieu's, it was decided to put on a picnic for all children in the community a few days before school closes. Details of this event will be furnished later.

A cheque for \$1510,582.50 was turned over to Hon. R. G. Reid, Provincial Treasurer, on Thursday as payment by the Canadian Pacific Railway Company of the purchase price of the Lacombe and Northwestern Railway which has been operated by the C.P.R. since the

transfer of ownership some few months ago. The sum involved represents the purchase price of \$1,500,000 and accrued interest since the date of the agreement.

Mr. and Mrs. Bushfield, of Calgary, have been visitors recently with Mr. and Mrs. John Cook.

R. Hood, who has been assistant at the National elevator here, has been transferred to Barons where he will have charge of the same company's elevator.

The value of the oil taken from the thirteen producing wells in the Turner Valley field during the month of April, 1928, exceeded \$145,000, as compared with \$120,000 in the month of March, according to figures recently published in Calgary. The total production of crude oil and naphtha during April was 37,274 barrels, of which 33,790 barrels of crude naphtha were delivered through the pipe line to Calgary. The figures showing the value of the monthly production are based on a price of \$3.95 per barrel for crude naphtha

and \$3.00 per barrel for light crude oil.

The Musical Eskadarts were here on Monday night, according to billing, but a dispute among the members almost resulted in no show being given, although there was a good crowd on hand. Matters were finally adjusted sufficiently to allow the performance to proceed, but a free show was given, the money paid being returned to the patrons. The entertainment given was considered excellent under the circumstances.

## kept pure and wholesome with FRIGIDAIRE

WHEN you buy meats or other products from our store, you can be sure that they have been properly refrigerated and are turned over to you, fresh and wholesome.

Frigidaire Electric Refrigeration is used to keep the food we sell constantly chilled to the right degree. It is the most modern and the most effective method of refrigeration known, both for the retail market and for the home.

We take pride in handling high quality food products and in turning them over to you in the best condition. Frigidaire keeps them constantly cold, preserves the full, natural flavor, makes it easier for you to prepare them for the table and makes your marketing an economy and a pleasure.

For Humanity!

The world revolt upon which is inscribed the names of men and women who have rendered distinguished service to the cause of humanity contains no name more worthy of such recognition than that of Henri Dunant, the centenary of whose birth in Geneva, Switzerland, was observed throughout the world on May 8th, of this year, and who lived to the ripe old age of 82 years.

What service did Henri Dunant render to mankind entitling him to this honor?

As a young man of 31 years, Dunant, author and philosopher, was travelling for pleasure in the summer of 1859 in Northern Italy, and happened to arrive in the neighborhood of Solferino just at the conclusion of the battle which is known by that name, and which was waged between the Austrians under Francis Joseph II, and the Allied French and Sardinians. The opposing forces were of about equal strength, the total of men engaged being about 60,000. The fighting was over, and the army met in the early morning and fought a sanguinary conflict until about two o'clock in the afternoon, when the Austrians were forced to retire. For so short a battle the losses were large, totalling in killed, wounded, and missing about 40,000.

Upon such a scene of carnage came Henri Dunant accidentally in the course of his journey for pleasure. Suffering and dying soldiers left on the field filled the air with their cries and the scene was a ghastly one, organized care for them. His deepest sympathies stirred for these fellowmen, who but a few hours before were in the pride of health and strength, Henri Dunant organized the neighboring villagers who did what little they could to cope with the gigantic task of ministering to those whose lives might still be saved.

But Henri Dunant did more. The vivid and terrible scenes he had witnessed so impressed themselves upon his mind that a year or two later he published his experiences in a small volume entitled "Un Souvenir de Solferino" (A Remembrance of Solferino), in which he advocated the formation of voluntary organizations to aid the army authorities in carrying out the national obligation of caring for the sick and wounded in future campaigns.

The result was the organization of the great world-wide Red Cross Society.

In this day and generation, with the events of the Great World War still fresh in mind, it is unnecessary to attempt any review of this international neutral, humanitarian organization. Sufficient it is to say that probably no other organization in the world's history has a finer record of achievement, or so completely commands the confidence and support of all peoples. The Red Cross flag and insignia is known and respected everywhere as a sign of absolute neutrality among warring nations, and the highest standard of self-sacrificing service to all suffering humanity.

Organized for service to the sick and wounded of armies in time of war, its amazingly efficient organization and outstanding service during the Great War impressed the statesmen of the world confronted with all the difficulties of after-the-war reconstruction of a well-nigh bankrupt civilization, that the Peace Conference at Versailles unanimously called upon the Red Cross throughout the world to remain organized and active, and undertake a comprehensive peace-time work among the civilian populations.

To the Red Cross, therefore, the creation of Henri Dunant, was accorded the distinction of being the only organization, apart from Governments, recognized in the Covenant of the League of Nations, with the solemn obligation imposed on all nations joining the League to encourage and promote the organization of voluntary national Red Cross Societies, having for their object "the promotion of health, the prevention of disease, and the mitigation of suffering throughout the world."

Today throughout the world, the Red Cross with its tens of millions of members, including all races, languages and creeds, is engaged in its mission of mercy. When Nature in a violent mood brings disaster upon a small community, or a Province, or a whole nation, the Red Cross is the first on the spot. Should an epidemic of disease break out, the Red Cross nurse and voluntary worker, inspired by the heroic and humanitarian ideals of Dunant and Florence Nightingale, are active in the alleviation of suffering. Unceasing, too, is the Red Cross work among the troops in the promotion of health and the prevention of disease. And should war again inflict rank and file, the Red Cross will be found better organized and stronger than ever to assume the burden thus imposed upon it.

In the galaxy of the world's great humanitarian institutions, Pasteur, Jenner, Lister, Florence Nightingale, William Booth, Curie, and others, the name of Henri Dunant shines brightly, while the sympathy which prompted his action on the bloody field of Solferino, and the inspiration leading to his conception of a great neutral volunteer organization in the cause of suffering humanity, continues to call forth the most splendid self-denial and service under the banner of the Red Cross.

## Stocking Alberta Fishing Waters

A total of 1,821,675 potential game fish were distributed in Alberta fishing waters in 1927. These included eggs, fry and fingerlings of Loch Leven, Cutthroat and Rainbow trout. In addition, nearly three million whitehead eggs were sent to commercial fishing waters in order to maintain the supply of fish for this growing industry in the province.

## When Food Sours

About two hours after eating many people suffer from indigestion. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—a fast-acting dose in water. It is pleasant, and has no

harmless. It has remained the standard used by physicians in the 50 years since its invention.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—no druggist.

## Textile Plant For Edmonton

MILL at Edmonton Will Convert Western Wood Into Fabrics.  
The establishment of a plant in Edmonton by the Western Canada Woolen Mills, Ltd., is contemplated during the coming summer, according to an announcement made recently. This project has been under an exhaustive series of technical experiments. The mill production has been scheduled to include a range of fabrics including blankets, light and heavy needs, overcoatings, uniforms, flannels and other types of cloth for which western wool is suited.

## RICH, RED BLOOD A REAL NERVE TONIC

### The Source Of All Nervousness Is Weak, Watery Blood.

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from a lack of rich blood. Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and to build up Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirit, and cures bilious or dependent people bright and cheerful. Miss E. M. Jones, of 1, Washington, Ont., tells what Dr. Williams' Pink Pills did for her as follows: "I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time. I was trying one medicine after another. I was advised to take Dr. Williams' Pink Pills and I have reason to be thankful that I did. The pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills again and they will be well and strong. These pills are sold by all medicine dealers or may be sent by mail at 50 cents a box to Dr. Williams' Medicine Co., Brockton, U.S.A.

## Faces Carved On Building

Likenesses Of Men Prominent In Chemical World Appear On New Structure.

Faces of living men are carved in stone on the new million-pound building of the Imperial Chemical Industries, nearing completion at Westminster Exchange.

One of the faces is that of the head of the company, Sir Alfred Mond. All the other carvings are said to be excellent likenesses of many men prominent in the chemical world.

The sculptures upon the building also includes figures of peacocks, which are said to be there as a symbol of incorruptibility, following the ancient tradition that the flesh of the peacock is incorruptible.

**Nation-Wide Fame.**—There is scarcely a corner of the great Dominion where the merits of Dr. Thomas' Eclectic Oil have not been tried and proved. It is one of the world's most efficient remedies for more than 100 kinds of ailments, whether arising from indigestion, rheumatism, or the skin. Its healing power is readily absorbed, and it can be taken internally.

**Film Industry In Calgary.**—Production of the first of a series of British films for use under Great Britain's quota law will be started in Calgary this month. May 1. Local capitalists, including F. Burns and A. E. Cross, are backing the project. Neal Hart will be the director of the first picture, which will be western in its flavor.

**There is no poisonous ingredient in Halliday's Corn Remover, and it can be used without danger or injury.**

## Baying Registered Seed

Saskatchewan Farmers Have Purchased Much More This Year. The Saskatchewan Registered Seed Association advises that farmers throughout the province have purchased more registered seed this year than in any year in the past and that they are becoming more interested in good seed. There has been a heavy movement of tractors from United States points to points in Saskatchewan this spring and the sale of motor tractors has greatly increased. Evidently farmers are becoming more and more interested in mechanical power.

During the war, Germany raised 12,000,000 men.

Insist on Minard's Liniment—accept no other.

W. N. U. 378

## Recipe For This Week

(By Betty Barclay)

### QUEEN GEORGIA'S CAKE

1 1/2 cups sugar.  
3 eggs.  
1/2 cup sour milk.  
1 teaspoon soda.  
1/2 cup raisin juice.  
1 cup nettar raisins.  
1 teaspoon salt.  
1 teaspoon cloves.  
1 teaspoon cinnamon.  
2 cups flour.  
4 teaspoons baking powder.  
Pump raisins, drain and chop, using a coarse cutter. Cream together shortening and sugar. Add 3 beaten egg yolks and 1 white (save remaining whites for frosting), raisins, soda, salt, and spices. Mix thoroughly. Pour into a greased layer cake pan and bake 15 minutes in a moderate oven (350° F.). Put together with melted frosting.

### JUNE WEDDING SALAD

Cover individual salad plates with crisp leaves of head lettuce. Place on these, strips of fresh or canned pineapple, one-inch squares of orange pulp, cut thick, and a few smaller sections of sweetened grapefruit pulp. Top with a mound of flavored whipped cream and a maraschino cherry or strawberry. Just before serving add a little lemon sauce—juice of one lemon mixed with two tablespoons granulated or powdered sugar. Arrange for wedding feast, or for a company dinner.

## Record Building Activity

Building and construction contracts awarded in Canada during the month of April, 1928, totalled \$5,315,450 in value, the largest total for any month ever recorded except for May, 1926, when \$57,136,700 worth of new work was contracted for. During April 1928, \$116,962,500 was the total of contemplated work in the Dominion. This total is the largest ever recorded for any month without exception.

The accumulative contracts awarded total for the first four months of the year is surprisingly large compared with previous years. It now stands at \$125,617,100.

### Calgary's Population

Calgary's municipal report on the city's population places the total at 72,360 this spring. The figure rises by the census of 1928 were 65,513. Two hundred houses were erected last year, and 200 will be built this year. There is an increase of 30 per cent. in the quantity of household effects being brought in by new residents. Bigger and better apartment houses are all full and hotels are operating at capacity.

**Useful In Camp.**—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectic Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, should a cold, or contusion, or sprain be sustained, nothing could be better as a dressing of the limb.

### Will Construct Power Plant

Construction of the first unit of a big power plant in the Estevan coal field is announced by the Montreal Engineering Company. \$750,000 project which will represent the first actual development of power in Saskatchewan by a central generating station, for distribution over a wide territory.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Worm Expeller.

National welfare of Canada is announced as \$272 per head of population. Get in the line early and make sure of your share.

Minard's Liniment for falling hair.

"Can you give me an example of wasted energy?"  
"Yes sir; telling a hair-raising story to a bald-headed man."

Heat naturally flows from a hot body to a colder one even in the electric refrigerator.

## Wheat Pool Building Fastest Grain Elevator

Elevator Now Under Construction Will Have a Capacity Of 600,000 Bushels.

Work has begun on the construction of a 600,000 bushel capacity grain elevator at Port Arthur for the Saskatchewan Wheat Pool, which, it is said, will be the most modern and the fastest operating terminal elevator in North America. It will be ready for operation about October 15, 1928. When completed it will be served by both the Canadian National and Canadian Pacific Railways, and will be able to receive as many as 500 cars of grain per day during the rush season. It will have a capacity of 300 cars per day of ten hours, and will be able to ship out grain at the rate of 150,000 bushels per hour.

The total length of the new elevator known as Terminal No. 7 will be 1,244 feet and the width 226 feet. The elevator trackage will provide space for 225 loaded cars to be spotted at one time, ready for dumping by the five automatic car dumpers, each of which will complete unloading a car of grain in ten minutes on the average. To take care of this immense volume of grain 28 elevator legs will be required to take the grain to the top of the elevator, from whence it is dumped into the scale garsers.

The completion of this terminal elevator will give the Saskatchewan Wheat Pool a total capacity of 72,000,000 bushels at the head of the Great Lakes which, together with a 2,000,000 bushel terminal elevator at Buffalo and the space provided by the Pool country elevator system in Saskatchewan, will give a total grain storage capacity of more than 100,000,000 bushels for the 1928-29 crop year.

### A Timely Suggestion

The old hand took his girl for a hungry ride. Nine miles out in the country the horse dropped dead. Louie said she knew she'd drop dead, too; it was a terrible predicament. "Suppose I give you a nice, sweet kiss. You sure will put lots of life in you." "Are you sure that a kiss will put lots of life in me?" "Positive, darling." "Then, suppose you kiss the horse."

## Record Building Activity

Building and construction contracts awarded in Canada during the month of April, 1928, totalled \$5,315,450 in value, the largest total for any month ever recorded except for May, 1926, when \$57,136,700 worth of new work was contracted for. During April 1928, \$116,962,500 was the total of contemplated work in the Dominion. This total is the largest ever recorded for any month without exception.

The accumulative contracts awarded total for the first four months of the year is surprisingly large compared with previous years. It now stands at \$125,617,100.

### Calgary's Population

Calgary's municipal report on the city's population places the total at 72,360 this spring. The figure rises by the census of 1928 were 65,513. Two hundred houses were erected last year, and 200 will be built this year. There is an increase of 30 per cent. in the quantity of household effects being brought in by new residents. Bigger and better apartment houses are all full and hotels are operating at capacity.

### Useful In Camp.

Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectic Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, should a cold, or contusion, or sprain be sustained, nothing could be better as a dressing of the limb.

### Will Construct Power Plant

Construction of the first unit of a big power plant in the Estevan coal field is announced by the Montreal Engineering Company. \$750,000 project which will represent the first actual development of power in Saskatchewan by a central generating station, for distribution over a wide territory.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Worm Expeller.

National welfare of Canada is announced as \$272 per head of population. Get in the line early and make sure of your share.

Minard's Liniment for falling hair.

"Can you give me an example of wasted energy?"  
"Yes sir; telling a hair-raising story to a bald-headed man."

Heat naturally flows from a hot body to a colder one even in the electric refrigerator.

## for Bottle-fed Babies

### Appointment Is Popular

New Inspector Of Taxation In Saskatchewan Has Had Wide Experience.

Hon. George Scott is to be congratulated upon his appointment as Inspector of Taxation in Saskatchewan. This is an exacting position, but Mr. Scott has many qualifications which would seem to assure that he will measure up to its demands. The new appointee has had wide experience in educational life, in business life, in agricultural life, and in public life. All this will be helpful to him in his new post.

Hon. Mr. Scott will be missed in the Legislative Assembly, where as a member for Arm River he rendered conscientious and able service not only in behalf of his constituency but also in behalf of the Province as a whole. Whether as Speaker of the House, or as a private member, he consistently enjoyed the respect and regard of members of all political groups.—Regina Leader.

The first advertisement printed in a newspaper was a "travel ad" in the Gazette of France, July 4, 1621, advertising the waters of Poree.

The promontories on each side of the Strait of Gibraltar are known as the Pillars of Hercules.

## FIREPROOF Farm Construction

GYPSEOC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations—for remodeling—for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gypsoe protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It is a fireproof material that will not shrink. By filling the joints with Gypsoe Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gypsoe comes in broad, light, ceiling high sheets of gypsoe rock. Take it in bulk—and it is especially useful for Atlanta—and is fasted by the insulating qualities of Gypsoe will allow you to fill in within a few seconds.

## CHAPTER XXIV.

It was at Fort Simpson, in November, on his way out, that Jack Doran heard of the war. They had loaded the Mohani River on a moose-skin barge to the Liard, and down the Liard to the Mackenzie on a spruce nose, arriving in Fort Simpson one raw November day when an icy wind from the North gave warning of the freeze-up. They had brought with them a few fur, which, close to the depot, he had got with his trapskins, and from the sale of these they hoped to be able to buy supplies for the home journey.

Their summer had been full of adventure. They had seen the leaves come on the trees, the flowers bud, bloom and fade, the leaves fall, and now the howling winds of November driven by the cold winds, but with their bags full of gold quartz to show what they had found, and with a little heap of dirt carried in chamois bags and glass plates, they were elated and confident.

Jack, with all the eagerness of the amateur, had been full of enthusiasm going in, and in the washing of gold from the sand of the river he had enjoyed endless delight. To see the first of yellow gold in the black sands at the bottom of a pan fired his imagination. Keith had complimented him on his success in panning.

"She's getting" better all the time," Keith had said. "So we are getting closer to the depot." He had a map of the country showing the exact spot where the claims would be staked. "You'll have some nuggets to bring home to that new wife of yours that will make her eyes pop out of her head."

It was in September they reached the place, and Keith announced the object of their search achieved. They staked their claims and gathered some rich pieces of quartz to bring back with them. Keith was exultant, and even George, the half-breed, grew garrulous with the prospect of riches. He was going to have three cars and a colored driver in a gray uniform!

Keith laid the plan for mining all arranged. He showed them where the sluices would be placed, drawing a diagram to show the angle at which they would be set, and how the riffles would be put in the bottom. He would bring the water in a pipeline from the river.

Can any nation of a Gum-Dipped Tire showing new and untried 150 miles. Every tire of any brand is available with this tire.

Why Gum-Dipping  
Increases Tire Life

A tire in use is being constantly bent backward and forward by road action. Such movement generates friction and heat that has a tendency to wear effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because Gum-Dipping puts a coating of new rubber around each separate cord that keeps from rubbing against the cords that lie next to it. It stays cooler and therefore lasts longer.

Your local Firestone Dealer will gladly advise you on your tire problems. Write to the nearest FIRESTONE TIRE & RUBBER CO. OF CANADA LIMITED, Hamilton, Ontario.

before. "You've got to put more thunder into it," he said, "and the people want color and action. Tell them about the children you saw with their hands cut off."

"But I didn't see any," protested the lad.

"Well, you heard of them—you might have seen them. Spend up a little—lay it on thicker, or you'll never get recruits."

But again the boy told just what he had seen in the mud-bellied hardships—the inescapable carnage, the comradeship and heroism of his companions of the trenches. There was no hatred, revenge or bitterness in his heart, only a great bewilderment. He appeared on behalf of his comrades—they were so brave, so cheerful and so fine—so willing to die.

Jack's heart was torn with the pity of it. Worst of all was the boy's switching hands, never still, but always caused by the war.

Jack's heart was torn with the pity of it. Worst of all was the boy's switching hands, never still, but always caused by the war.

The return journey, lacking the stimulus of novelty which had kept them from discouragement, going in was tedious and depressing. Their way lay through a gloomy, barren country, and the weather was cold and wet. The shortening days and lengthening nights too, were unfavorable to travelling. But at length, rugged, unkempt, unshaven and dirty, they arrived in Fort Simpson just before the freeze-up.

The good-natured proprietor of the store, who had been waiting for them, giving them the news of the war as the transactions went on. "I wish I was younger, and I'd be off," he said, "I'd like to do a bit of fighting before my time comes to tell off."

"What is it all about?" Jack asked, as he looked at the man's face. "Well, I'm not clear on that, but sure it's a poor war that ain't better than no war, and you see war has to come, and he had lived to clear out the surplus population. We breed too fast—ain't that the truth?—so it's either pestilence, war, or famine, and sure a lot more fun than the other two."

Jack looked at him indignantly. "How many children have you?" he asked. He had noticed several little half-breeds around the store, moccasined and dressed in European style, looking inquiringly at the strangers. The storekeeper did not resent the question at all. "I think there are six boys big enough to go," he said. "Three of them are out about the traps, and haven't heard about it yet, but the other three are in the store. Their mother is cuttin' up a little, but she'll calm down; she's a good woman. We have eight other boys on. It's a good chance for the boys to see the world."

The war did not relate itself in any way to Jack Doran until he arrived at Peace River. He had one consuming thought in his mind now, and only one, and that was to get to Eagle Mines as soon as he could, and to make his home at once to the telegraph office and sent her a wire. "Mrs. Jack Doran, Eagle Mines:—Back safe, expect me in a week. Love, Jack."

Peace River was alive with excitement. Home-entrants walked the streets waiting for the train to take them to Edmonton. There was some delay, owing to trouble on the Jubah Hill.

Jack, Keith and George got to a room at "The Peace," and soon had the grime of travel washed away, and went to the dining-room for supper. Keith was uniformed as at a table, eating noisily and drinking. The room was full of excited talk.

There was a meeting in the hall that night, advised by a huge red poster in the stores. It said that Major Gossett and Pts. George Croves would address the meeting. Pts. Croves had been wounded at Mons and been invalided to Canada. There were naps in the dining-room, and the men were at a table, eating noisily and drinking. The room was full of excited talk.

The man who tries to prove too much very often proves nothing. One way to put in your time is over the paddock's counter.

The Experience of Mrs. Roy Brown is Well Worth Reading

Peterboro, Ont.—"I was in a miserable state of health, my nerves were not sleeping, but was completely exhausted. I was unable to get up and around, I felt on taking it, and was completely restored to health. I cannot express my gratitude for the wonderful help it gave me."—Mrs. Roy Brown, Peterboro, Ont.

All druggists. Tablets or liquid.

## Teeth and Health

Issued by The Canadian Dental Society  
By The Saskatchewan Dental Society

## CHILDHOOD DISEASES AFFECTING TEETH

It occasionally happens that teeth erupt faulty in shape or with the enamel pitted and stained, and you wonder what has caused them.

Now a very probable source of this trouble is a general disturbance from some constitutional disease associated with high temperatures, such as scarlet fever, measles, or chicken pox. Occasionally this disturbance is so great as to destroy the tooth germ, but more often it merely affects the tooth structure as described above.

But there are two general diseases that, in particular affect teeth, structure and tooth eruption.

One of these is the disease of faulty nutrition and it is worthy of note that it is a disease not only of the very poor who are deficient in food and sufficient food, but of the rich who have an abundance of food but do not improve their diet.

The characteristic affections of the teeth from rickets are these: the deciduous teeth erupt late and, in the more extreme cases, there is a general deformity of the skull and jaws, however, these affections are local and whilst the permanent teeth in turn erupt late, the result is, faulty or defective teeth. Moreover, the teeth themselves are structurally affected, and their enamel is defective, and they are liable to caries.

The disease, more or less specifically related to tooth malformation is tuberculosis. A child suffering from tuberculosis will erupt both the deciduous and the permanent teeth, but the deciduous teeth are not absent as it should be, with the resultant loss of the succeeding permanent teeth.

It is perhaps easier to understand why these diseases should injuriously affect teeth, when you remember that the teeth are in the formative stage through childhood, and hence are particularly liable to influences of a disturbing nature.

## No Cause For Worry

Great Britain still in a Position To Pay Her Debts

It is regrettable that into the United States permanent election campaign there have to be injected unwarranted attacks upon Great Britain. Here is what Senator Reed, in an address before the Daughters of the American Revolution, had to say: "England has been given 50 years in which to pay her debt to us, and God knows if she will be there to discharge this colossal obligation."

Does the fact, the Halifax Herald wonders, that the Reeds are in the midst of a political campaign justify the attacks upon such a man? The answer, perhaps it does, but when they have calmed down, may they run across this contemporary utterance by Winston Churchill, British Chancellor of the Exchequer: "England is not done yet. She still has the power to help a hungry or ailing world."

And Great Britain probably will enjoy that power for many years to come, when the Senator Leeds will have been lost in oblivion and when much that passes for "one hundred per cent. Americanism" will look like retrograde.

Canada To Establish Bureau Of Standards

Acceptable To Provinces

The Government proposes shortly to set up a Bureau of Standards which will operate under the National Research Council, according to Hon. James Mackenzie, Minister of Trade and Commerce. When the new Bureau of Standards is established, he said, Canada will not have to accept her standards from Chicago. A Bureau of Standards would be acceptable to all the provinces of Canada as well as to the Dominion, companies throughout the Dominion, the Minister claimed.

Good Price For Fritz Steer

Arnie Turner, 11-year-old girl who cleaned up with her steer at the fair, sold her steer for \$100.00. She proceeded to do the same in Calgary, afterwards led the animal into the ring at Edmonton, where it fetched 50 cents a pound live weight. The purchasers being the Hudson's Bay Company. The sale netted \$600, in addition to which prices of \$100 were won at each of the three shows.

Neuralgia succumbs to Mearns's Elixir.

## An Outstanding Invention

Two Ontario Men Have Plans For Quick-Firing Machine Gun

The attention and interest of the world's war departments, especially the highest ordnance officers, were focused on London, Ont., at the present time because in this city plans have recently been completed for a new machine gun that is undoubtedly the most outstanding quick-firing invention yet perfected.

It is R. Hindehardt, superintendent of the Carling Brewery, assisted by H. Koenig, of Germany, now of London, is the inventor of this weapon which may have an important effect on the armaments of the world. Defects of both cooling and recoil systems prevalent in the machine guns of a nation in the world war have been entirely done away with in the new London gun, that is the result of seven years' tests and proving.

Probably the greatest advance made in the new quick-firer is the so-called feature of non-explosive liquid air cooling—a goal sought by the war research laboratories of all nations. This invention alone can be readily disposed of for a very long time, as the liquid air, which has been extremely dangerous to handle in the past, is now rendered perfectly safe. At last a machine gun that will not overheat, and necessarily have to cease action to cool off, has been built.

## Speed Up Construction

German Contractors Use Furnace On Wheels To Dry Walls

Homes and apartments are so scarce in Berlin, Germany, that architects and constructors think up every conceivable device for hastening the process.

Their latest quick service help consists of a furnace on wheels which is calculated to hasten the drying process in buildings under construction. It is placed outside the house or apartment building, and furnace pipes are laid from it into the room to be dried. The heat is constant in just as though a hot air furnace were in operation in the basement.

In this way, it is estimated, construction is hastened by many days, as the painters and decorators can get busy much earlier.

Next month another 1,100 head of buffalo will be shipped from the Canadian National Park, to be sent to the big reserve north of the Peace River. Overstocking of the Wainwright Park renders this necessary.

Asthma Doesn't Wear Off. Asthma does not make the mistake of waiting for autumn to come away from town. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. P. McLaughlin, of the Asthma Clinic, early will prevent incipient danger from becoming chronic and save hours of awful suffering.

The Arabs were the first to discover the art of refining sugar, with the Egyptians a close second.

## GREAT BRITAIN IS ANXIOUS TO OUTLAW WAR

LONDON.—Sir Austen Chamberlain, secretary of the foreign office, speaking in the House of Commons concerning the Kellogg outlay of war proposals, said that the British government not only warmly welcomed the initiative of the U.S., but was hopeful it would be the necessary conclusion, and would make a real contribution to world peace.

Sir Austen's statement followed remarks by Ramsay MacDonald, the Labor leader, who supported the Kellogg proposals.

"Our attitude toward this note is going to have a very considerable influence in Anglo-American relations," Mr. MacDonald said. "Nobody has been in a position to study it who has followed the American press and will deny that these relations are not quite so good as they ought to be."

Sir Austen said he would proceed in the ordinary diplomatic channels in treating on the proposal, although he had at first favored submitting the matter to a conference of international jurists, as the case of the Locarno pact.

This idea was dropped, however, he explained, when "one of the governments concerned"—understood to be the United States—declared that it did not approve this method.

The British attitude, the foreign secretary continued, had already been forwarded to the governments of the dominions in order that all elements of the empire might seek a common position toward the proposal. He expected to transmit that reply to Secretary Kellogg soon after the responses of the dominions were received.

Sir Austen was heard with profound interest by the whole chamber.

The only mark of disapproval came when he said that war had never been used as an international policy by any British government of the present era. His speech was interrupted by a number of benches burst into protest, but the secretary maintained his position.

Ramsay MacDonald said first reaction was that the plan was ridiculous, in view of the complicated nature of the problems and the simplicity of the Kellogg scheme. Later he was convinced that the plan was bound to be a forward step in the battle for peace. Its realization, he said, would make it impossible for nations to threaten war, and thus prevent sowing the seeds of war.

David Lloyd George was another who argued that there would be point in making reservations to the United States proposal.

## Made Chancellor Of

### Oxford University

Viscount Grey Of Fallodon Elected By Acclamation

LONDON.—Viscount Grey of Fallodon, former Secretary of State for Foreign Affairs, will be elected by acclamation to the chancellorship of the University of Oxford in succession to the late Viscount Cave. Apart from the gracious gesture to Viscount Grey the decision to elect him without a contest is generally regarded as an indication of the university authorities' desire to separate the chancellorship from its association with politics.

Viscount Grey was foreign secretary from 1905 to 1916.

### Hunting Gold With 'Planes'

NEW YORK.—An aeroplane hunt for gold in Ontario is planned by Jack Hannam, wealthy gold miner and entrepreneur, who is president of the North American Exploration Company, has purchased a Fairchild monoplane for the trip, and said four other planes would join the quest in June. The expedition would head for the Red Lake district of North-western Ontario.

### Italian Naval Program

Rome.—A new Italian building programme was announced by Under-Secretary Sirtani in the senate recently. Sirtani said the new programme comprehended construction of 20,000-ton cruisers, four destroyers, and four submarines, for which contracts will be let this month.

### Killed By Father's Car

Toronto.—Four minutes after her father had passed her in his car, her 18-month-old fifth daughter, daughter of Mr. and Mrs. E. J. Dewdney, was killed by a car driven by her parent in Mississauga, suburb.

## Would Follow British Plan

United Farmers Of Canada Have Scheme For Co-operative Stores

Winnipeg.—An elaborate scheme for the organization of co-operative societies on the British model is now being drawn up by the United Farmers of Canada, according to W. M. Thrasher, secretary of the Saskatchewan section of that body. It is hoped to lay the foundation of a system of stores which will ultimately extend all over the West.

The central body in Canada will, it is understood, have the hearty co-operation of the great British Wholesale Co-operative in Manchester, which serves millions of customers in hundreds of stores all over the United Kingdom.

Share capital in small units, Mr. Thrasher stated, will be subscribed to start stores, and afterwards will be erected to prevent any one shareholder from becoming predominant. Though called share capital, the stock to be issued will virtually be debentures in nature, since it will receive only a fixed return on the investment.

## May Consult League

Possibility Of China and Japan Submitting Dispute To Geneva

Geneva.—A protest from China to the League of Nations over Japanese military action in Shantung is a possibility, Cheng Lou, Chinese member of the League Council, said today. He associated Press correspondent. He adds he was awaiting instruction from his government at Peking.

Mr. Lou, who is now in Paris but is coming to Geneva for the meeting of the council in June, said over the telephone that the Chinese and Southerners have the same view concerning the attitude of the League of Nations. He thought it convenient to refer to the League of Nations in deciding to submit the dispute to the League of Nations.

Japan's attitude on the question of referring the Shantung dispute to the League of Nations is unknown here. The Chinese-Japanese conflict is regarded in Geneva as continuing to develop the Kellogg outlay of war proposal.

## Looking For New President

University Of Alberta Will Seek Strong Man To Fill Vacant Position

Edmonton.—Hon. Percival Baker, minister of education, will leave shortly for points east, on a tour of investigation that will have as its object the giving of a man Canadian-born or at least Canadian experienced.

He will go right across the Dominion to the Maritime provinces, and may also cross the line into the Eastern and middle states.

There has not even been decided yet to be a Canadian, but other things being equal, the preference will naturally be given to a man Canadian-born or at least Canadian experienced.

## New Loan To Coast

Project Roads For Northern British Columbia Country

Victoria, B.C.—A new railway route pass through the mountains from the coast to the Peace River and northern British Columbia country was announced by H. M. Rolston, editor of the Portland Canal News who was here on his way north to Stewart.

"The new pass which has just been located for getting over the Nias and Skeena waterheds to the Finlay basin, is 3,500 feet lower than the original pass mapped under Sir Donald Mann," Mr. Rolston said.

## Alberta Mounted Rifles

Ottawa.—"C" Squadron, 2nd Regiment the Alberta Mounted Rifles at Nanton, has been reorganized as Highways, Alta. The department of national defence has announced. A regimental badge of revised design has been ordered for the squadron.

## German Leaving Hong Kong

Hong Kong.—Sir Cecil Clementi, Governor of Hong Kong, has left for England. He is returning via Canada. Sir Cecil Clementi was the governor of Hong Kong since 1925, and has been in public service in China for many years.

## Man Power Plans

New York.—A model aeroplane, the motive power of which is obtained by hand, is a boat is now being demonstrated by Lehman Well, who now plans to construct a man-powered machine on the same principle. The model in test rapidly took the air.

## Plan Meets Opposition

British House Discusses Cold Storage For Imported Meat

LONDON.—Speaking for the government in the House of Lords, Lord Strathclyde, minister of agriculture, promised most carefully to consider a suggestion that all refrigerated meat imported into Great Britain from countries where the foot and mouth disease is prevalent should be placed in cold storage at the port of landing for three weeks.

Lord Kilsant, in opposing the suggestion for three weeks on arrival, he said that in 1927, of which 925,000 tons were imported chilled beef of a quality almost equal to the best home-killed beef. In order to secure imported meat in a satisfactory condition, however, it should be available in Britain within 21 days after being shipped.

If chilled meat had to go into cold storage for three weeks on arrival, he said, its value would be considerably reduced as it would have to be frozen. The result would be that the importation of chilled meat would cease and nearly half the people of Great Britain would have to consume frozen meat. It would also mean a pay a higher price for it than they did at present.

## CLASH BETWEEN JAP TROOPS AND NATIONALISTS

Shanghai.—The Japanese 28th brigade under General Sotomura, bore the brunt of fighting between the Japanese and Nationalist troops.

General Sotomura's brigade came into contact with a force of southern troops at Kiaton, about 15 miles east of Tsinan, and dispersed them after their stubborn resistance.

When Sotomura's forces were returning to Tsinan they encountered a powerful force under General Chen Tiao Yun. Fighting was last reported still in progress with the result unknown.

Chen Tiao Yun was formerly governor of the province of Anhwei and commanded the three nationalities army which was cutting the Shantung railway April 30 at Ninghsu.

The Japanese were continuing to try their attempts to disarm the nationalists as rapidly as they came in contact with them in the enemy's main area. The Mikado's forces had occupied the bridge across the Yellow River at Tsinan and other strategic points.

With the exception of the two encounters with Sotomura's forces most of the fighting was of a minor nature.

## Would Have U.S. Mediate

Suggestion Made That Action Be Taken To Prevent War Between Japan and China

Geneva.—The peace purposes of the League of Nations will be served if Washington should have a single word and prevent war between Japan and China, said a League authority discussing the possibilities of friendly mediation either by the United States Government or by the League.

Geneva circles appear confident that some something influence will be exercised to prevent the Chinese-Japanese conflict from growing worse. The League is ready to act if asked.

## Arrives In Big Plane

Ottawa.—Captain Alfred Loewenstein, Belgian, multi-millionaire, arrived at Linderberg Field here in his tri-motor monoplane, the largest machine Ottawa has ever seen.

Loewenstein was the guest of Premier Mackenzie King at dinner, at Laurier House. He declared emphatically that his visit to the capital was merely a social call.

## British Boys Study Agriculture

The above shows a splendid group of British Public and Secondary school students who have just arrived at the Macdonald Agricultural College.

Recruited by the Department of Colonization and Development of the Canadian Pacific Railway, these young men will pursue a two years' course at the College. During the summer months they will work on farms where places have been selected for them. On completion of their studies they will engage in various branches of Canadian agricultural operations, by which they will be accustomed to Canadian methods.

The scheme under which these students were brought to Canada has now entered upon its fourth year of operation and the College authorities are thoroughly satisfied with the soundness of the plan. At the extreme left of the picture is Dr. H. Barton, Dean of the Faculty of Agriculture, Macdonald College, and the extreme right is Mr. J. H. Hamilton, Instructor in Agriculture, who is especially charged with the supervision of the students under this particular scheme.

## PROMINENT FINANCIER

Alfred Loewenstein, financier, now in Canada, who, representing one of the ordinary stock of the company, is reported to be seeking to acquire control of British Traction Co., one of the world's largest public utilities.

## Passports Required For Short Vacation

Week-End Tickets To Europe Cost Britishers \$10.00 Extra

LONDON.—The British Easter holiday crowd of "trippers" to Europe was thrown into consternation by being asked to pay \$10 extra for their annual spring outing abroad for the first time since the war.

Since 1918 a special facility had been in force under which persons were allowed to buy week-end tickets to European France and Belgium by air, available from Friday to Tuesday, which allowed the holders to travel without a passport. Henceforth, however, the passport rule will apply.

Persons who enquired at the French consulate-general in London, learned that the British authorities had never consented to grant a reciprocal advantage to French and Belgian nationals, and the French Government now intended to make alone of this facility by an individual an occasion for withdrawing it altogether.

## Says Alberta Bill Is Given Support

Hon. C. A. Dunning Has Every Hope That It Will Pass

Edmonton.—Hon. Charles Dunning, Federal Minister of Railways, telegraphed Premier Bowden in reply to the latter's request for co-operation in getting the Northern Railway extension through the house that he has every hope of the bill passing. The Government has done everything possible, he says, to facilitate it and extra time has been given private bills after the House had unanimously agreed that Government business should take precedence.

Mr. Dunning adds that talking-tactics on private bills have become very prevalent during the present session.

## Wins In World Race

Japan Beats Competitor Who Was Held Up By Storm

Tokyo.—Tokio Anis, taking the Eastern route, won the Globe encircling race with the fellow countryman of Kiyomasa, by his trip, in 33 days, 15 hours and 25 minutes.

Western world competitor, who is now on a liner crossing the Pacific Ocean, missed his chance of winning the novel race when the steamer carrying him from England to New York was delayed by fog and storms. A prize of \$10,000 will be awarded Anis, while Matsui gets \$500.

## SASKATCHEWAN OLD AGE PENSION PLAN OPERATIVE

Ottawa.—The senate rejected the House of Commons bill amending section 98 of the criminal code by a vote of 22 to 22. This section makes it unlawful for any person or association to advocate the employment of force to bring about changes in the government, industry or the economic conditions of the country, and gives certain powers to public officers to deal with violations of the act.

## Landslide In Colombia

Bogota, Colombia.—Ten persons were killed and 100 injured in a landslide at the Verde-Chimera mines, according to information from Bio Suco. It is feared many more were buried alive and rescuers are endeavoring to reach the imprisoned souls, the information said.

## Start Flight To Tokyo

Le Bourget, France.—Captain Melchior D'Olay, Captain Gonin and Melchior D'Olay, left today on a commercial airplane for Bucharest, en route to Tokyo. They will make many stops on the way, including Asia Minor, India-China, China and Japan.

## German As Official Language

Capetown, South Africa.—The Government assembly will begin the 8, passed a motion to amend the South African constitution to make German one of the official languages.

## New Money For Ireland

Dublin, Ireland.—A few months hence the people of the Irish Free State will begin to handle new coins intended to displace British coins in local circulation. The contract for minting was given to the London Mint, which has submitted Dublin the new coins, which will proceed with production, beginning with silver coins.

The new coins will be of the same value as British coins up to half-crowns, and no higher denomination will be coined at present. Provision has been made for a proportion of silver higher than that in British coins. In order to counteract any possible suspicion of the new coinage the existence and the three-penny piece will be of nickel, the new three-penny piece being of the size of the British silver sixpence, but without any alloy. Bronze coins also are being struck, but it will take a little longer to substitute these for the corresponding British coins.

Bronze coins also are being struck, but it will take a little longer to substitute these for the corresponding British coins.

## Urges Acceptance Of Canadian Currency

Washington Asked To Sanction Its Use In U.S. Centres

Ottawa.—The Journal in an editorial says: "Due to a letter addressed by A. H. Jarvis, of Ottawa, to the United States consul-general here, steps have been taken by the State Department in Washington, which may result in the future acceptance of Canadian currency at all centres across the line."

"Hesitation on this score on the part of Americans in many districts has long been a source of inconvenience and annoyance to Canadian visitors to the U.S. Although we are Uncle Sam's best customer and dealer in his goods, the American dollar is accepted without question over here, there are many places and business houses and hotels across the border where the Canadian dollar is no more regarded than if it were the paper of Soviet Russia."

## British Bankers Worried

Over Flood Of American Capital Which Is Entering Canada

LONDON.—Grave fears are entertained by British bankers concerning the flood of American capital which is entering Canada, according to Major Hunt Croyne, London financier, who has just returned from a trip to England and the Riviera.

"It is impossible for us to secure money in England for anything like the rates at which we can secure it here," said Major Croyne. "This is due largely to the interest of the U.S. in Canadian securities. The result is that British capital is naturally prevented from coming in to any extent, and the fear is felt in Britain that the new alignment of money power in Canada will have a serious effect on the future relations of the Empire. I heard this referred to in England as a menace."

Capetown, South Africa.—The Government assembly will begin the 8, passed a motion to amend the South African constitution to make German one of the official languages.

## JAPANESE FORCES IN CONTROL OF CITY OF TSINAN

Shanghai.—Japanese soldiers had cleared the last Nationalist forces from Tsinan, capital of Shantung province, and were in complete control of the city for the capture of which the Southerners had expended the entire force of their drive.

Reports of casualties involved in the expulsion of the Southerners from Tsinan, and now loss of life is believed to be heavy for both Japanese and Chinese with the probability that many Tsinan civilians will be numbered among the dead.

Three field batteries which the Japanese had placed in the foreign territory near the United States consulate, were used to shell the city with shrapnel early in the day. Most of the population of 400,000 were caught and sent to the Japanese slaughter is believed to have resulted.

In the course of the fighting the Japanese blew up the southern and eastern portions of the city. The what southerners were left in the city departed in a rout, being northward along the Yellow River.

Resistance by the Nationalists in the main amounted to no more than sniping, although occasionally small bands put up desperate fights to avoid dispersing and expulsion from the city by the Japanese.

According to Nationalist reports concerning this city, the Japanese have complete control not only of Tsinan but of the entire Shantung railway, and the south end of the Yellow River, and the city of Kiaton, located 15 miles east of Tsinan.

## To Speed Mail Delivery

Canard Steamship Line May Use Airplanes For This Purpose

Montreal.—To further speed up delivery of mail from the British Isles for Canada, it is understood that the Canard Line in Liverpool have been considering a scheme whereby their ships would be allowed to release carry an aeroplane to be released when the Gulf of St. Lawrence is reached, the plane to take important mail either to Rimouski or to Quebec.

## CHAMPION CHATTER

VOL. 1

Thursday, May 17, 1928

No. 14

Published in the interests of the People of Champion and Farmers of this vicinity.  
**GEORGE L. DEPUÉ, Editor.**

## EDITORIAL

If a man says his town is a bum town, you may be sure of one of two things. Either his town caught him doing something he is ashamed of or else his name doesn't mean much on a dotted line.

Overhead in Sisoms Mill, "Have you any pumpkin pie?"  
 Frank, "Sure the pies are all punk in here!"

## TORMENT

"I don't see any hell in this," said the new arrival, looking over the Hanks Golf Course. The imp in charge leered and remarked quietly, "We have arranged a slow foursome which will be just ahead of you for all eternity."

Al Miller is the new purchaser of a 14 foot

Mc-Dr'g wide type disc harrow.  
 When autos collide it is always the gully driver who does the most cussing.

Have you taken a peek at that Mc-Dr'g weed-er. Its best!  
 He may not have a little fairy in his home, But he has a little miss in his engine.

We have to show you a new Harrow-Plow, a Mc-Dr'g, of course.

American Demanding the best there is and paying one dollar down.

The man who is still skeptical of the coming of the Mc-Dr'g dies to down grain.

Pete Patterson says: "No man's opinions are entirely worthless, even a watch that won't run

at all is right twice a day."

Mc-Dr'g implements on a farm means more work better done at less cost.

Modern styles may be imperfect but it isn't necessary to take along a few safety pins in case of an emergency.

Overhead at Service Garage filling station: Customer—Have you some of that gasoline that stops Knocking? Kulpas—Yes. Customer—Then give my wife a glass.

Hats Off—A. Huggles: "Henderson, have you anything for gray hair?" Doug: "Nothing but the greatest respect, Archie."

"Good Equipment Makes a Good Farmer Better"

## Local and General

Lost—License plate 32-127. A Baker, Imperial Oil Station.

The Ladies' Aid will meet at the home of Mrs. W. C. Hoskins on Thursday, May 31st.

Miss Smithson's room was closed Wednesday when she attended the funeral of her cousin at Hillcrest.

W. Ulrich has an addition to his farm residence practically completed, the improvement being highly noticeable.

B. A. Richardson, of Calgary, fisheries overseer, for No. 3 district, was a visitor in Champion on Thursday.

The date for the annual flower show under the auspices of the Women's Institute will be announced shortly.

Tourist cars are beginning to be in evidence daily. It would appear that 1928 will be a banner year in this respect.

"What Price Glory, coming to the local theatre this week is considered by many a greater picture than 'The Big Parade'."

G. F. Smith has purchased the lots formerly occupied by the Anderson garage and will erect an office building in the near future.

Wednesday was the first half holiday, and to judge by the appearance of the streets everyone took advantage of the opportunity to go somewhere or other.

Citizens at large will welcome the appearance of the grader on the streets. The wet spring was not conducive to good roads and outside the main street, which was gravelled last year, everything in the way of streets was alarmingly rough. L. Church is in charge of the operations.

## The Savoy Cafe

Under New Management

Has been completely overhauled and refitted and is now equal to anything in the province outside the larger cities.

Prompt and Courteous Service

ALL WHITE HELP

For the man in a hurry our Lunch Counter will prove a convenience.

Your Patronage Solicited.

E. Gemulini made a trip to Tabor the first of the week where he has farm property in the irrigation district. He returned home on Tuesday night.

Geo. Depue took in the baseball game at Claresholm, between Calgary Hustlers and the local team on Wednesday afternoon. The game was won by Claresholm.

Edwin Fisher, who left some time ago to join the United States marines, failed to stand the eye test, and in consequence has returned to Champion arriving home on Tuesday.
